

Presentation 4: Time-series Trends

Bonsitu, Jasmine, Katherine, Muse

CAR Data Drill Down - Weekly Trends

Insights:

- Monday has the highest volume of calls on avg. for all lines except immigration, which gradually increases w/ a peak on Wednesday and then declines
- Looking at avg. calls by 3rd activity in Family line:
 - 5–6 more callers that end up abandoning the call instead of going to the Simple Divorce line
 - And about 12 more callers on avg. that abandon instead of going to Consumer queue
 - Process for getting into Consumer/SD queue may be confusing or long, so callers hang up
- Consumer queue is very underutilized in the Housing line as well, with about 1–3 callers in Next activity and 3rd activity
- Avg. # of abandoned calls is much higher in Housing than Family in Next Activity (around 35 calls compared to 1)
 - Callers are not going to the Consumer Queue or LegalMenu2

Recommendations :

- Make prompts for lines as concise as possible using AI tools/LLM
- Create a note on the website with optimal day of the week to call back for particular EP line

Main & Legal menu call flow dashboard updates

1. Combined Main and Legal menu call flow dashboards into singular report, with buttons to toggle between tabs
2. Added date range slicer for user to indicate dates to restrict graphics calculations to
3. Filtered graphics to only display Top N sub-menus navigated to for enhanced visual clarity

Legal Menu Seasonal Traffic: Family Menu

Finding: Consistent elevation in family menu callers since January 2025

- a. Aligns with known patterns of elevated calls post-holiday season
- b. Driven by callers calling for DV, DCFS or name change matters
 - i. Sign of increased familial dysfunction and distress
 - *Since Legal Aid does not handle parenting/child support matters, are majority DV/assault issues?
 - ii. Higher volume in calls → greater proportion of calls reaching closed queue
 - iii. Combined with previous findings on high call volume at 8 am—indicates urgency of matter

Recommendations:

- 1. Highlight resources for victims/survivors on Legal Aid's website
 - a. Particularly important due to time-sensitive nature
- 2. Train more intake specialists to handle family issues

Called Number Analysis

Improvements since last version:

- Map out the call flows & Indicate on which step the inbound calls ended
 - For calls that end in the previous number, the next number will show either “Ended”, “Ended on the 1st transfer”, “Ended on the 2nd transfer”, and so on.
- Remove the duplicated legs for the same transfer numbers
 - Deduplicate the transfer numbers that have both an originating and a terminating legs
- Add drill-down feature to visualize all call flows in one chart

	Correlation ID	Call Flow	num_legs	Number Description_1	Number Description_2	Number Description_3	Number Description_4
0	00000fe9-dfa0-41c5-986b-d9ce731f2715	[Main number]	1	Main number	Ended	None	None

Call Volume by Intake & Transfer Numbers

Call Volume for Intake & Transfer Numbers

Findings:

- **Main number** received the most calls (~530 per weekday), followed by **Unknown numbers** (~170) and **Farmworker main number** (~20)

Next Steps:

- Consider merging the numbers with daily volume less than 10 calls
- Understand the purpose for the unknown numbers as they consist of a huge number of inbound calls

Call Flow Depth by Intake Number

Call Flow Depth by Intake Number

Total numbers connected ● 1 ● 2 ● 3 ● 4

Findings:

- Most calls ended within one intake number and the first transfer number
- Only **Main number**, **Farmworker main number**, **Direct Line to front desk**, **Transfer to the English menu**, and **Transfer to the Spanish menu** have second or third transfers

Call Flow Width by Intake Numbers

Call Flow Width by Intake Number

Intake Number	Unique 1st transfers	Unique 2nd transfers	Unique 3rd transfers
Main number	10	19	6
Unknown	9	5	5
Farmworker main number / Migrant Legal Assistance Program	6	4	5
Transfers to the English main menu	6	4	3
Direct Line to Front Desk	4	6	5
Transfers to the Spanish main menu	3	2	1
Bankruptcy Helpdesk Voicemail	2	1	0
Community Legal Clinics	2	1	0
Markham Eviction Help Desk	2	1	0
Nursing Home Ombudsman	2	1	0
A2J Immigration (Lisa Palumbo's direct line)	1	0	0
Austin Intake Voicemail	1	0	0
Criminal Records	1	0	0
Fair Housing Intake Voicemail	1	0	0
HIV Intake Voicemail	1	0	0
Juvenile Expungement Help Desk (JEHD)	1	0	0
Veterans Rights Project Voicemail	1	0	0
CLASP Voicemail	0	0	0
Education Law Referrals Voicemail	0	0	0
Internal voicemail - not client related	0	0	0
OP Appeals Project	0	0	0
Trafficking Survivors Assistance Project (TSAP)	0	0	0
Total unique transfer numbers used	12	20	8

Findings:

- The **Main number** is not just high volume, it's also the most complex initial entry point, connecting to 10 unique first transfer destinations. This indicates it serves as a broad internal sorting hub
- The Unknown calls are routed to 9 unique first transfer destinations, suggesting its coverage of a wide variety of topics.
- **Transfer Network Growth:** The transfer network expands at the second level (20 unique numbers vs. 12 at the first level)

Volume of Incoming Calls by Month & Week

- The Main number is the most popular line, with the Main number peaking in August with a steep drop after September.
- The Unknown number line peaks in May, and stays between about 500,000 – 1.5 million calls during the year.
- Nursing Home, Farmworker/Migrant, and Bankruptcy are the next three highest, but they're considerably less at <30,000, however they also peaked in August and September.

Volume of Incoming Calls by Month & Week

- Numbers with a lower volume of calls show much more volatility and spikes/dips.
- Internal Voicemail has a huge spike in August
- There is a smaller spike in May
- Criminal Records and Veterans Rights peak on Wednesday instead of Tuesday like most lines

Volume of Incoming Calls by Month & Week

- CLASP had a huge spike in December
- OP Appeals peaks has a spike in July
- Education Law has a mid-week spike on Wednesday

Volume of Incoming Calls by Month & Week

- January and April are the peaks for the Spanish menu
- Most of the calls for the Spanish line are on Friday, which is different from the trend you see with most lost where most of the calls are earlier in the week.
- The trafficking survivor line seems to only have one call

Next Steps

Further Investigation:

- Investigate the cause for the big spikes seen with Internal Voicemail in August and CLASP in December
 - Were calls being incorrectly routed to the internal voicemail or some other reason?
 - Is CLASP related to an end of the year deadline of winter break?
