

Week 4 - Call Abandonment (Employment, Immigration, HIV Menus)

Adam Sahn

Methodology

- 1) Group the data by Contact Session ID (by call), filtered to just calls where the caller enters one of the relevant menus at any time
- 2) Group by call and iteratively develop rules for known call scenarios
 - a) Ex: Closed Queue = Not Abandoned, Callback = Not Abandoned, Customer Left + on relevant menu = Abandoned
- 3) Examine remaining calls, determine what happened, and create new rules to capture whether they were abandoned or not
- 4) Repeat until all calls are categorized as abandoned or not, with a reason for each call!

Employment Menu

LAC Main Number – Employment Menu Call			
Page 12 of 17	Flow	06/17/2024	Version 1.6

Continued from "LAC & Migrant Main Numbers – Legal Menu Call Flow"

	Abandoned	Reason	count
0	Abandoned	Customer Left Employment Menu	80
1	Abandoned	Customer Left Employment Queue	26
2	Abandoned	Left PreQueue Message	10
3	Doesn't Apply	Different Menu	34
6	Not Abandoned	Closed Queue	1490
4	Not Abandoned	Callback	276
7	Not Abandoned	Front Desk Transfer	2
5	Not Abandoned	Closed Hours	1

	Abandoned	Count	Percent
1	Abandoned	116	6.04
2	Doesn't Apply	34	1.77
0	Not Abandoned	1769	92.18

- 6% Abandonment is within the acceptable range

Immigration Menu

0	Abandoned	Left Immigration Menu	234
1	Abandoned	Left Queue	18
2	Doesn't Apply	Different Menu	29
4	Not Abandoned	Closed Queue	748
3	Not Abandoned	Callback	70
6	Not Abandoned	Heard Voicemail	46
7	Not Abandoned	Reached Intake	9

	Abandoned	Count	Percent
1	Abandoned	252	21.80
2	Doesn't Apply	29	2.51
0	Not Abandoned	875	75.69

- 21% Abandonment is high - could be due to political climate, or because callers don't hear their call reason on the menu

HIV Menu

LAC Main Number – HIV Menu Call			
8 of 17	Flow	06/17/2024	Vers

Continued from "LAC & Migrant Main Numbers – Legal Menu Call Flow"

- 38% Abandonment is very high - I hypothesize that this is due to callers changing their mind about calling

	Abandoned	Reason	count
0	Abandoned	Left HIV Menu	291
1	Doesn't Apply	Different Menu	98
5	Not Abandoned	Heard Voicemail	264
3	Not Abandoned	Closed Queue	92
2	Not Abandoned	Callback	10
4	Not Abandoned	Front Desk Transfer	3

	Abandoned	Count	Percent
1	Abandoned	291	38.39
2	Doesn't Apply	98	12.93
0	Not Abandoned	369	48.68

HIV Menu (Continued)

- 38% Abandonment is very high - I hypothesize that this is due to callers changing their mind about calling

You have selected the HIV intake line. This line is for people and households impacted by HIV. You will be asked for information about HIV status and medical care. All information you provide will remain confidential. Your call may be monitored for quality or training purposes.

If you have selected the HIV Intake Line by mistake, press 1 to return to the previous menu.

To proceed to the HIV intake line , press 2.

- Despite a high call abandonment rate, I do not have a recommendation that involves changing this verbiage. It makes sense that LegalAid asks callers about their HIV and medical care status, and it is good that callers are given a heads-up that they will be asked sensitive information. Within the HIV menu, abandonment rate is not a good metric for success

Takeaway and Next Steps

Takeaways

- The employment menu has a low (6%) abandonment rate
 - This menu is functioning well and meeting caller needs!
- The immigration menu has a high (19%) abandonment rate
 - This could be due to political climate, or because callers don't hear their call reason on the menu
 - I don't think wait times are the primary reason because more people leave the menu than the queue
- The HIV menu has a very high (38%) abandonment rate
 - Despite a high call abandonment rate, I do not have a recommendation that involves changing this verbiage. It makes sense that LegalAid asks callers about their HIV and medical care status, and it is good that callers are given a heads-up that they will be asked sensitive information
 - Within the HIV menu, abandonment rate is not a good metric for success

Next Steps

- Aggregate our work, identify all call abandonment with consistent formatting
