

Week 4 - Call Abandonment (Employment, Immigration, HIV Menus)

Adam Sahn

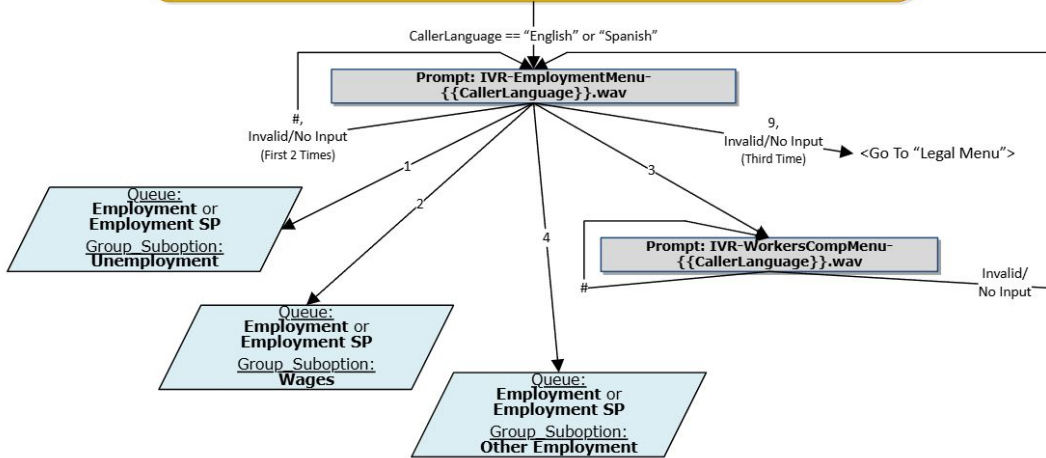

Methodology

- 1) Group the data by Contact Session ID (by call), filtered to just calls where the caller enters one of the relevant menus at any time
- 2) Group by call and iteratively develop rules for known call scenarios
 - a) Ex: Closed Queue = Not Abandoned, Callback = Not Abandoned, Customer Left + on relevant menu = Abandoned
- 3) Examine remaining calls, determine what happened, and create new rules to capture whether they were abandoned or not
- 4) Repeat until all calls are categorized as abandoned or not, with a reason for each call!

Employment Menu

LAC Main Number – Employment Menu Call			
Page 12 of 17	Flow	06/17/2024	Version 1.6

Continued from "LAC & Migrant Main Numbers – Legal Menu Call Flow"

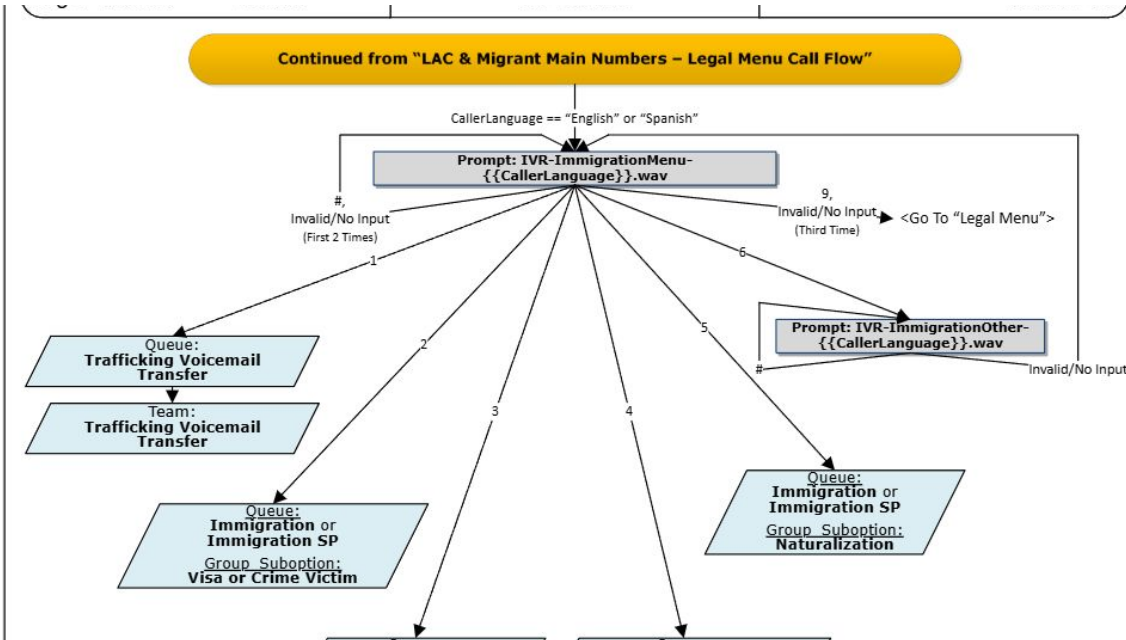

Abandoned	Reason	count
Abandoned	Customer Left Employment Menu	280
Abandoned	Left PreQueue Message	17
Doesn't Apply	Different Menu	94
Not Abandoned	Closed Queue	3781
Not Abandoned	Callback	538
Not Abandoned	Closed Hours	2
Not Abandoned	Front Desk Transfer	2

	Abandoned	Count	Percent
1	Abandoned	297	6.30
2	Doesn't Apply	94	1.99
0	Not Abandoned	4323	91.71

- 6% Abandonment is within the acceptable range

Immigration Menu

- 19% Abandonment is high - could be due to political climate, or because callers don't hear their call reason on the menu

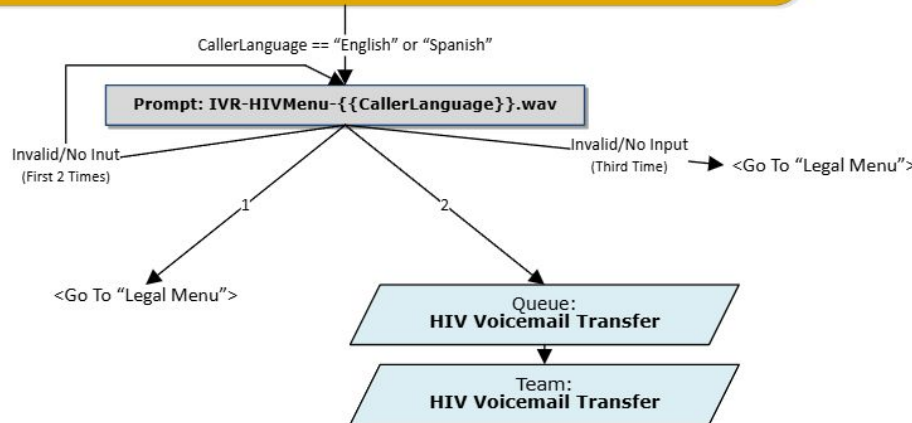

Abandoned	Reason	count
Abandoned	Left Immigration Menu	640
Abandoned	Left Queue	39
Doesn't Apply	Different Menu	80
Not Abandoned	Closed Queue	2530
Not Abandoned	Callback	184
Not Abandoned	Heard Voicemail	139
Not Abandoned	Reached Intake	18
Not Abandoned	Closed Hours	2
Not Abandoned	Front Desk Transfer	2

Abandoned	Count	Percent
Abandoned	679	18.68
Doesn't Apply	80	2.20
Not Abandoned	2875	79.11

HIV Menu

LAC Main Number – HIV Menu Call		
8 of 17	Flow	06/17/2024
		Vers

Continued from "LAC & Migrant Main Numbers – Legal Menu Call Flow"

- 36% Abandonment is very high - I hypothesize that this is due to callers changing their mind about calling

Abandoned	Reason	count
Abandoned	Left HIV Menu	756
Doesn't Apply	Different Menu	234
Not Abandoned	Heard Voicemail	836
Not Abandoned	Closed Queue	252
Not Abandoned	Callback	23
Not Abandoned	Front Desk Transfer	6

Abandoned	Count	Percent
Abandoned	756	35.88
Doesn't Apply	234	11.11
Not Abandoned	1117	53.01

HIV Menu (Continued)

- 36% Abandonment is very high - I hypothesize that this is due to callers changing their mind about calling

You have selected the HIV intake line. This line is for people and households impacted by HIV. You will be asked for information about HIV status and medical care. All information you provide will remain confidential. Your call may be monitored for quality or training purposes.

If you have selected the HIV Intake Line by mistake, press 1 to return to the previous menu.

To proceed to the HIV intake line , press 2.

- Despite a high call abandonment rate, I do not have a recommendation that involves changing this verbiage. It makes sense that LegalAid asks callers about their HIV and medical care status, and it is good that callers are given a heads-up that they will be asked sensitive information. Within the HIV menu, abandonment rate is not a good metric for success

Takeaway and Next Steps

Takeaways

- The employment menu has a low (6%) abandonment rate
 - This menu is functioning well and meeting caller needs!
- The immigration menu has a high (19%) abandonment rate
 - This could be due to political climate, or because callers don't hear their call reason on the menu
 - I don't think wait times are the primary reason because more people leave the menu than the queue
- The HIV menu has a very high (36%) abandonment rate
 - Despite a high call abandonment rate, I do not have a recommendation that involves changing this verbiage. It makes sense that LegalAid asks callers about their HIV and medical care status, and it is good that callers are given a heads-up that they will be asked sensitive information
 - Within the HIV menu, abandonment rate is not a good metric for success

Next Steps

- Aggregate our work, identify all call abandonment with consistent formatting
