

Housing Menu Abandonment:

Sana Nanlawala

Current Flow of the Housing Menu

Overall Look:

22,232 unique calls entered any part of the housing flow, housing menu, pre-tenant menu, tenant menu, or tenant deterrence menu—at any point of their call. This is important to note as calls may have been abandoned in other flows (family/employment/etc) and may have entered at a specific part of the housing flow (not necessarily at the housing menu).

One such case was customers directly entering at the tenant menu (possibly a phone number directly leading to it).

Of these unique calls, 21,291 calls were NOT abandoned by the customer (**95.77%**). From these calls, 40 customers left at the Tenant Deterrence Menu and 45 left after reaching the deterrence menu, and then going backwards to the Tenant Menu then leaving. 10 left after reaching the deterrence menu then backtracking all the way to the Housing Menu then leaving. 66 calls reached a queue and was met with a closed queue prompt.

Examples of Abandonment: 941 calls (4.23%)

Customer leaves after the Pre-Tenant Menu.

Customer leaves after the Housing Menu.

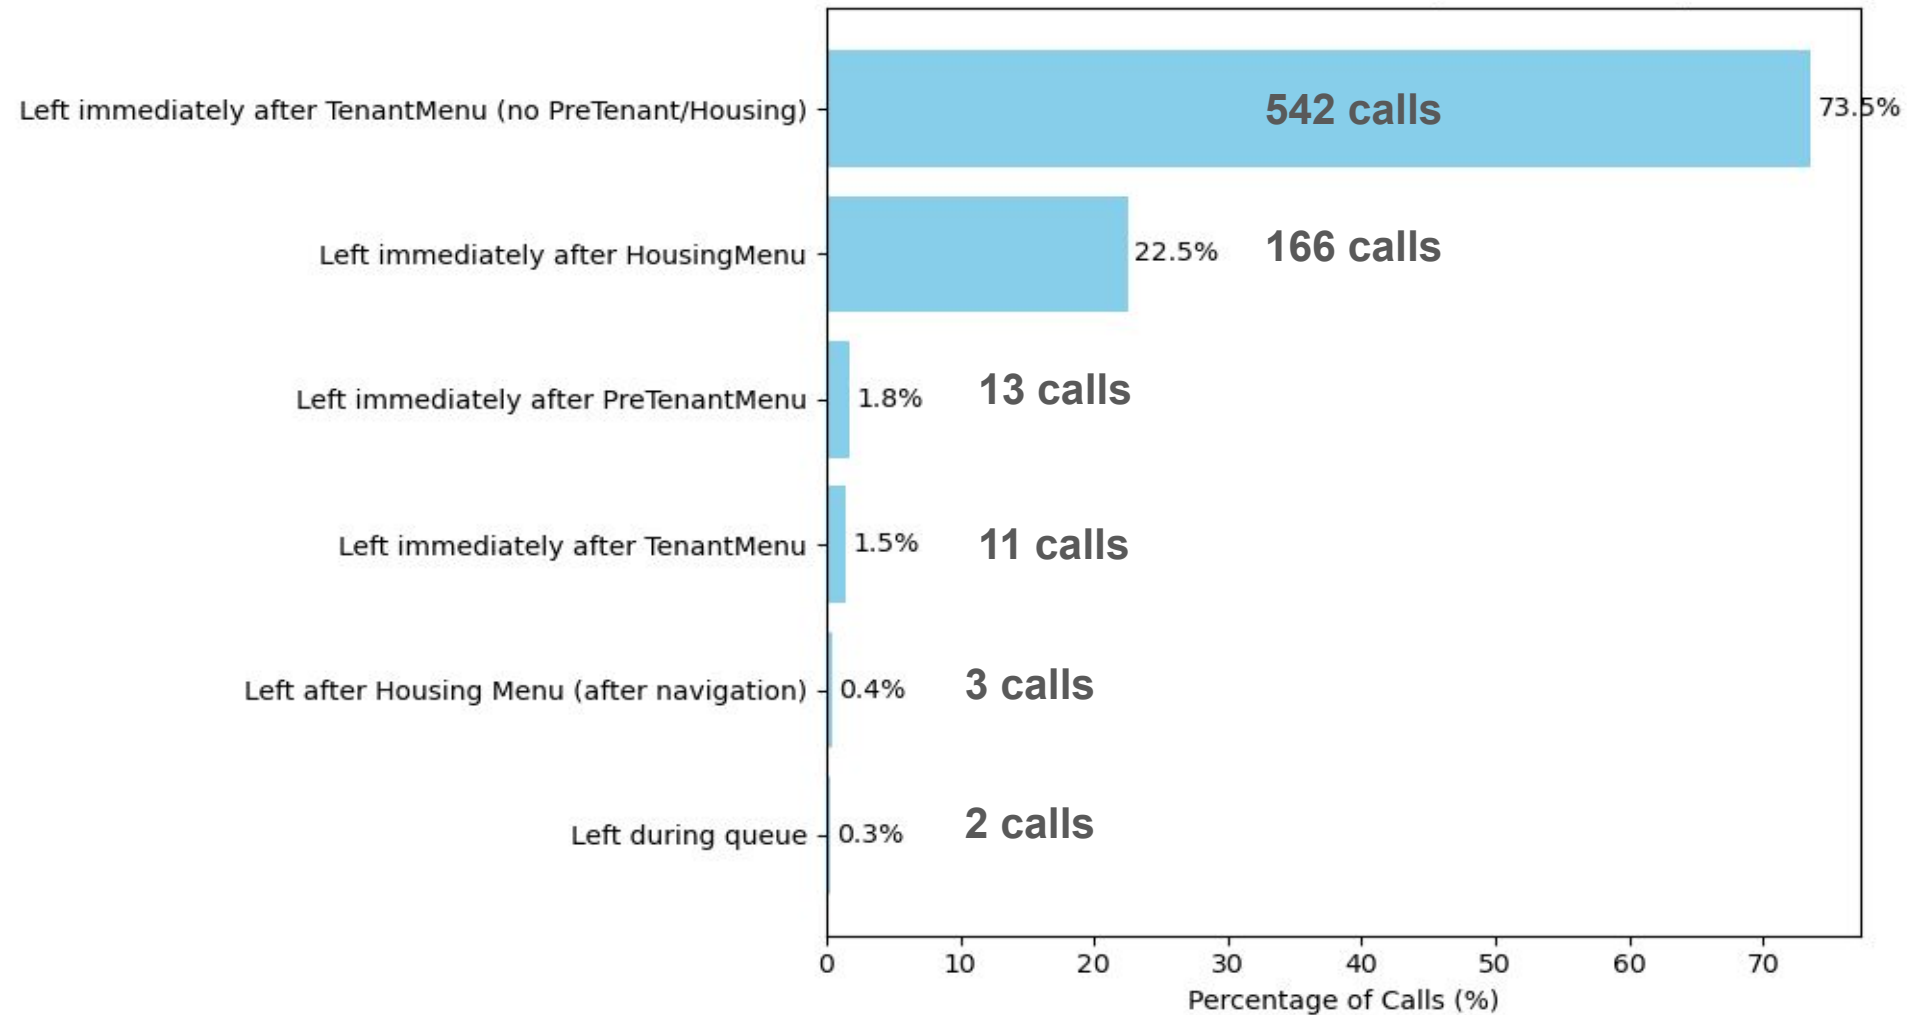

Customer leaves after the Tenant Menu.

Entering the Tenant Menu directly (not entering the Pre-Tenant/Housing Menus) and then the customer leaves.

Customer navigates throughout the flow but ultimately leaves after the Housing Menu.

Customer leaves during a queue.

Customer Leave Scenarios

Going Forward:

Remaining calls in which the customer left: **204 calls / 21.68% not captured**

- 1 instance of the customer leaving after the Main Menu
- 12 instances of the customer leaving after Legal Menu 2.
- Further exploration in where the customer is leaving the call (other flows, leaving in EP)

Left In EP:	Preceding Activity	Count of Customers Left
Legal Housing Menu EP	Housing Menu	32
Legal Housing Menu EP	Tenant Menu	71
