
Presentation 4

Will Krew, Yi Hyun Kwon,
Vincent chen

Goal of this presentation

Key Selection Analysis at Main Menu

Analysis of Subsequent Visits to Legal Menu

OtherLegalMenu & LanguageSelectionMenu Analysis

Reminder of Definitions

"Fully Listened To"

The caller remained in the prompt until the second last option

- Excluding "To repeat..." or "For more information..." from the full prompt

"Successful Call"

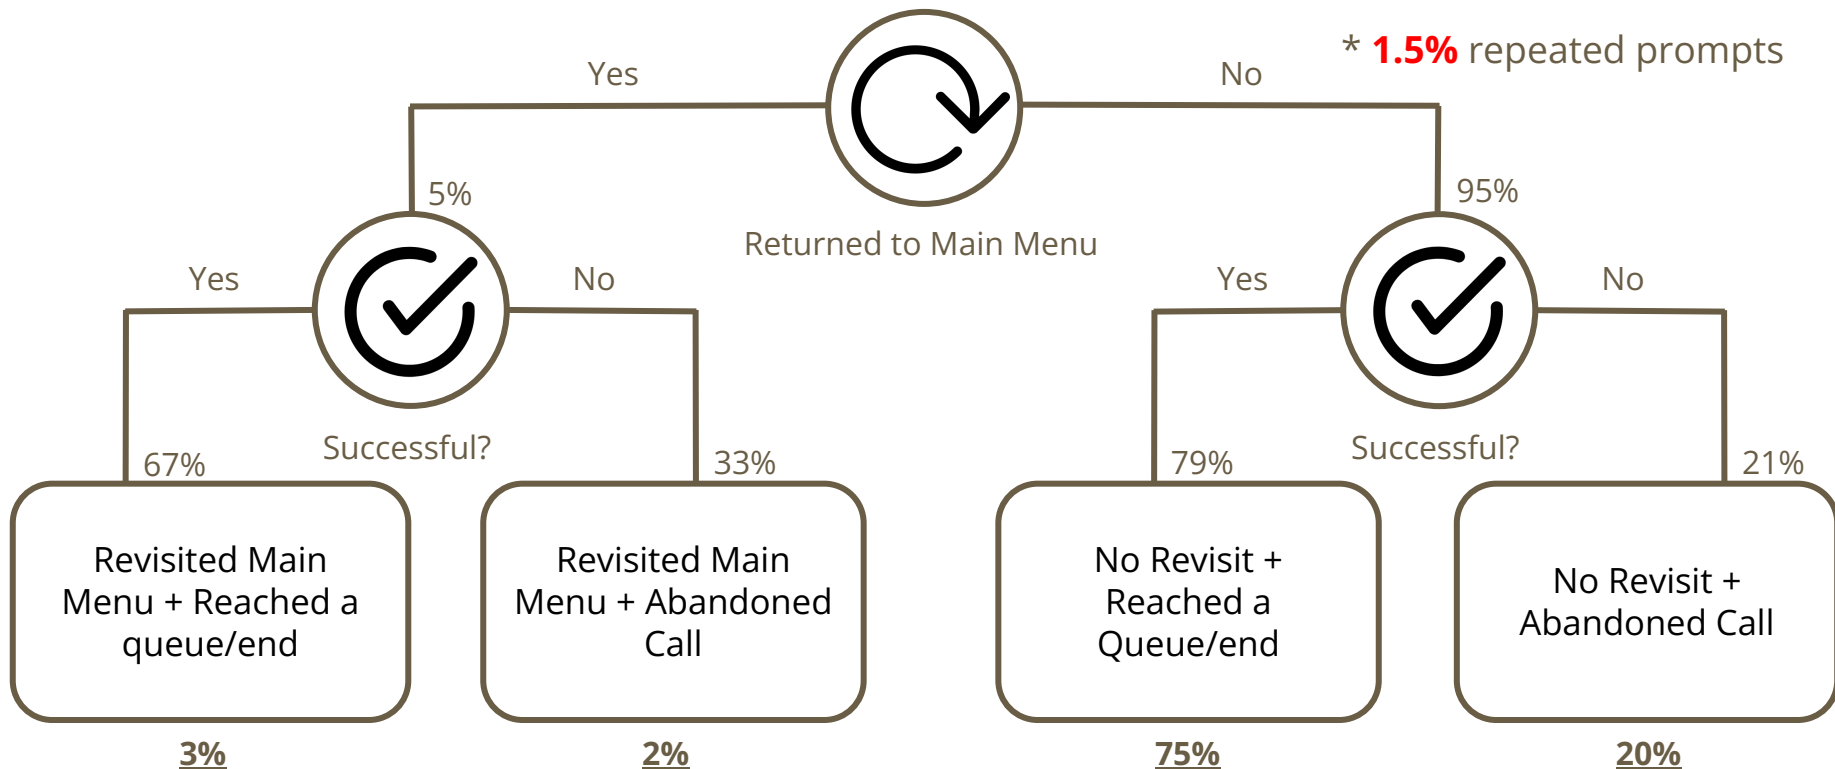

The caller reached one of the following:

- 1) Closed Queue
- 2) Active Queue
- 3) Reached a dead-end

* a dead-end is a point where Legal Aid can no longer assist the caller

Main Menu Analysis

Approximately **27%** of callers that reached a queue connected to an agent

Main Menu Observation/Action Item 1

Observation

Keys 2 and 6 lead to the **same StaffDirectoryTransfer Queue** (27 sec difference)

Key 2: If you are trying to reach the attorney or paralegal you are working with, press 2

Key 6: For our staff directory, press 6

→ Both options help callers connect to a staff

Solution

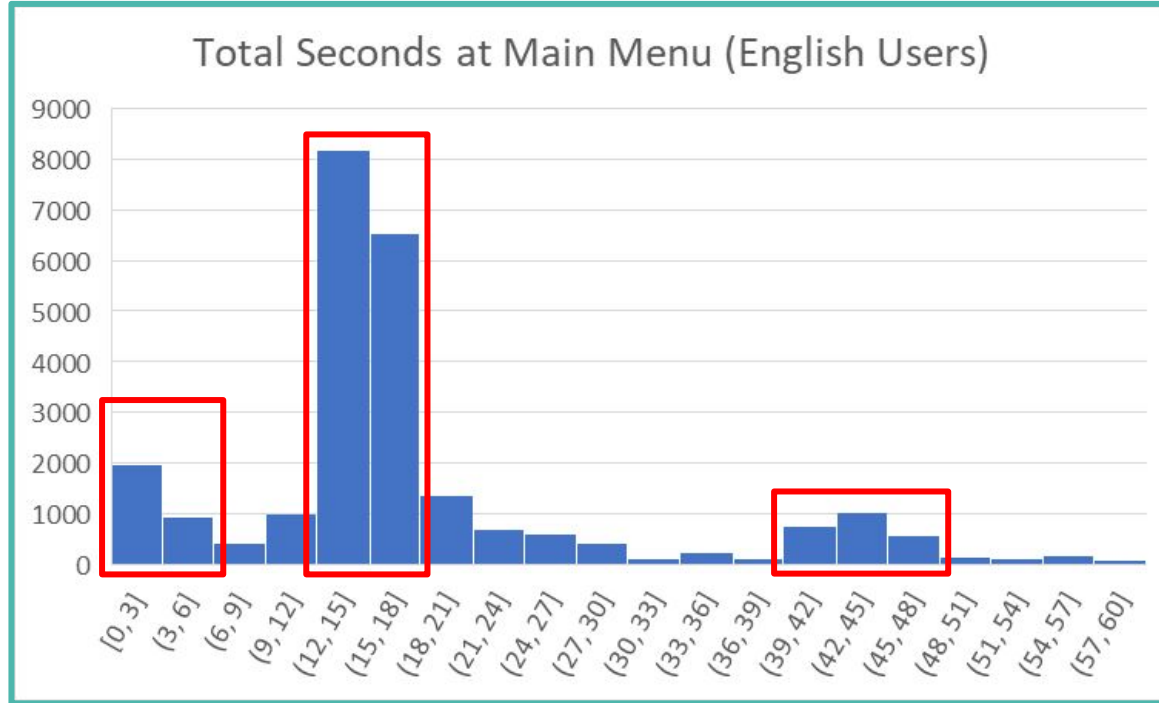

Rephrase Key 2 verbiage to consolidate the two options

Limitation

CAR data does not show what key the caller pressed but only what activity the caller reaches

→ Key Distribution Analysis Required

Time Spent at Main Menu for English Users

Proportion of callers who make a selection during the Option 2 prompt (between 6–14 seconds):

12.85%

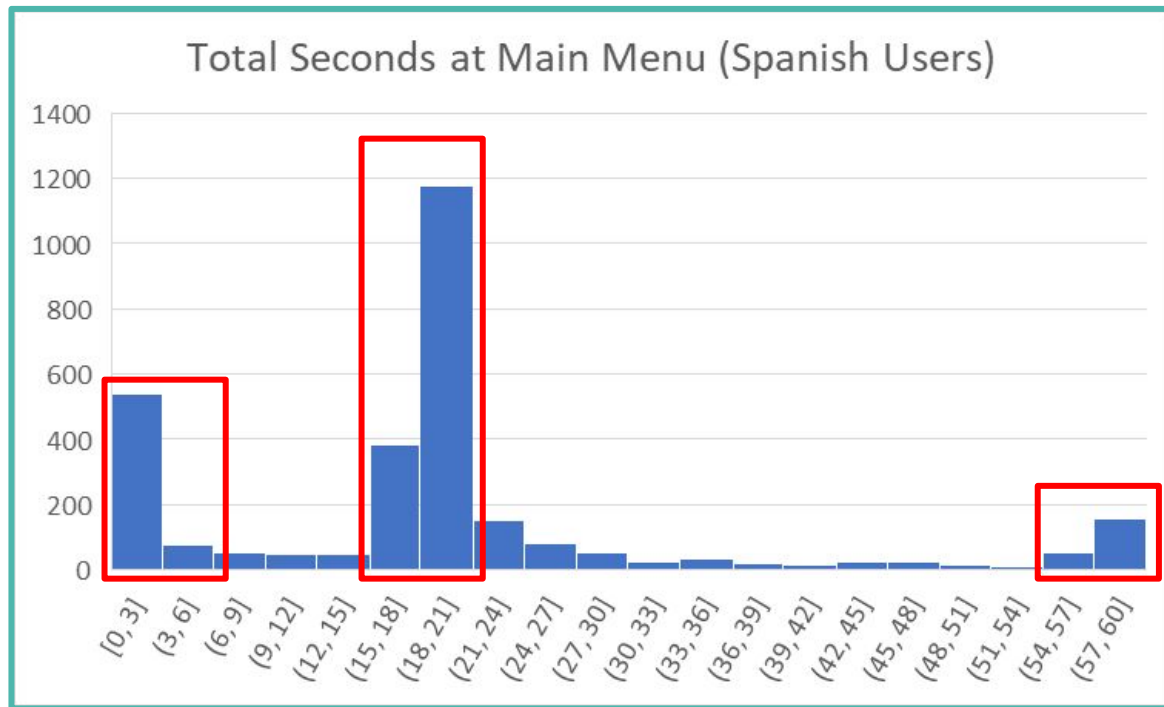

Proportion of callers who make a selection during the Option 6 prompt (between 36–40 seconds):

0.90%

Proportion of callers who make a selection before hearing Option 6:

87.77%

Time Spent at Main Menu for Spanish Users

Proportion of callers who make a selection during the Option 2 prompt (between 6–17 seconds):

12.85%

Proportion of callers who make a selection during the Option 6 prompt (between 51–56 seconds):

0.80%

Proportion of callers who make a selection before hearing Option 6:

92.41%

Main Menu Observation/Action Item 2

Observation

Key 3 and option 1 of Key 8 have the **same call flow** (31 sec difference) * LegalMenu1 Prompt is 34 sec

Key 3: If you are calling for help with a legal problem that you have not talked to us about yet, press 3

Key 8: Are you calling for help with a legal problem? If yes press 1, if no press 2

→ Both options asking if the issue is a legal issue and leads to LegalMenu1

Solution

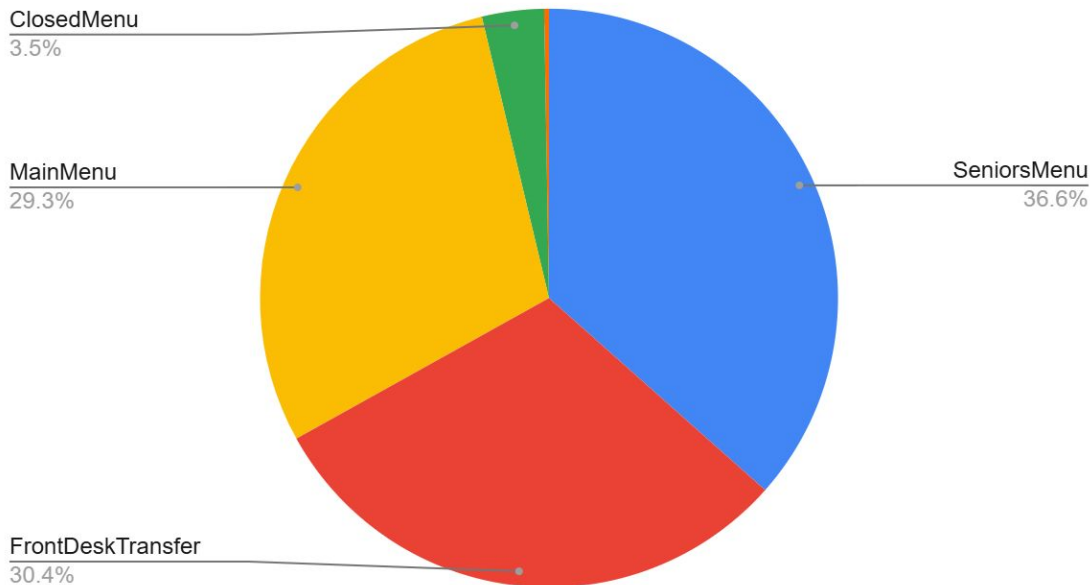

Rephrase Key 3 verbiage to consolidate the two options

Next Steps

Analysis on proportion of people going to LegalMenu1 from those that chose option 8 to truly determine the redundancy of option 8

Main Menu Observation/Action Item 2

Distribution of Next Activity After Selecting Key 8

Summary

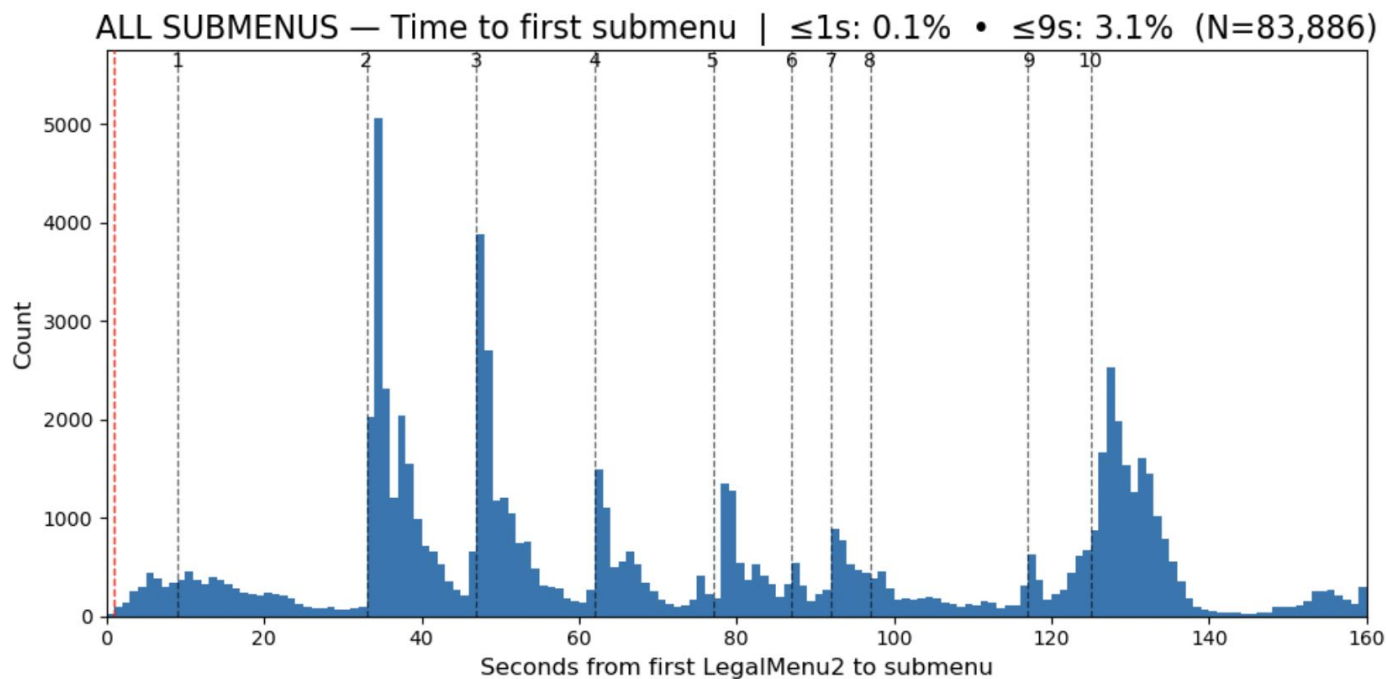

- 1) **5.74%** of callers choose Key 8 from Main Menu
- 2) Roughly the same proportion of calls enter **LegalMenu1** (**SeniorsMenu**), transferred to the **Front Desk**, or return back to **Main Menu**

→ Unclear if Key 8 is totally useless/redundant

Legal Menu Questions

1. Can we change the numbering of the legal menu?
 - How many people have memorized the keys they have to press to navigate to a menu?
2. What's the breakdown of people navigating to the Other Legal Menu?
3. Where are people abandoning when they go to the housing menu?
 - Is the abandonment also high for people who choose housing as the correct menu in the first choice, or only higher when housing menu is their final choice

Q1: Time Spent in Legal Menu

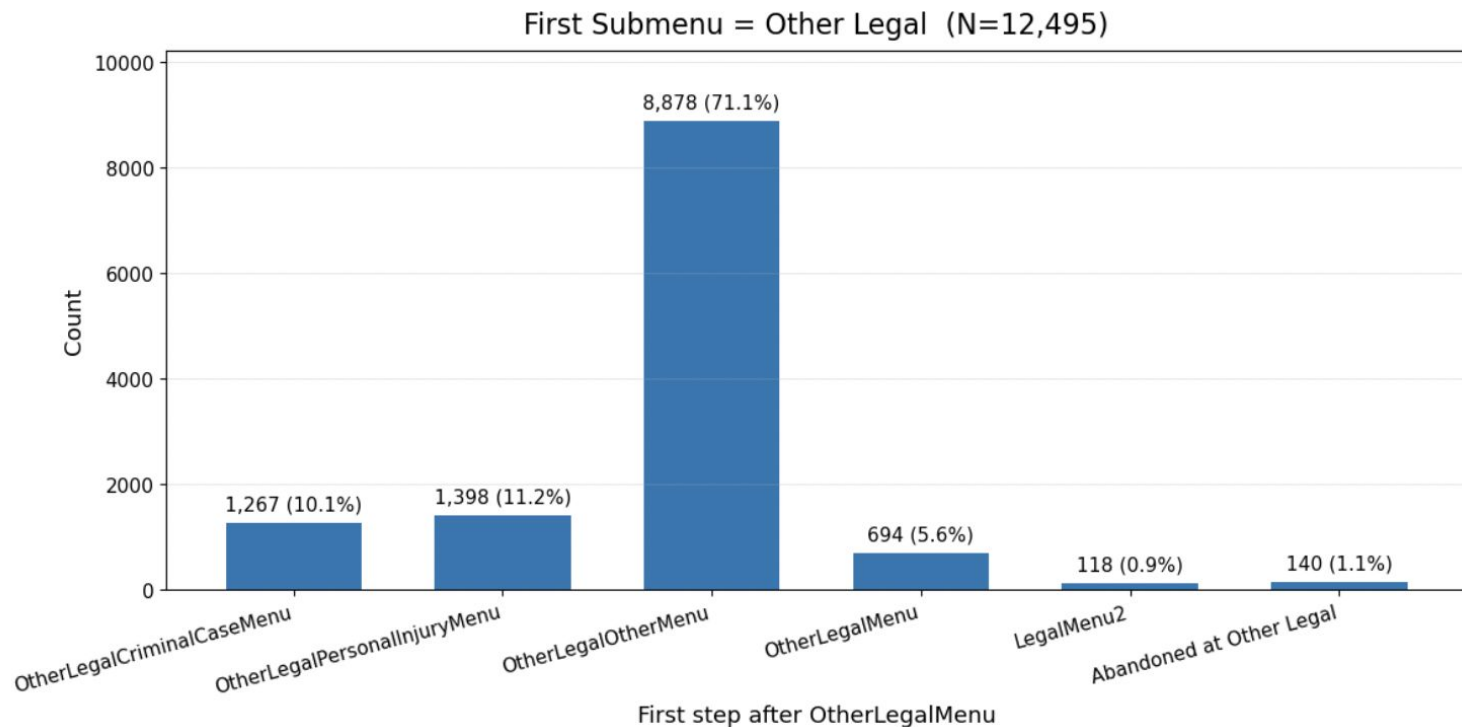

1. HIV
2. Family
3. Housing
4. Benefits
5. Consumer(SP) Queue
6. Criminal Records Voicemail
7. Employment
8. Immigration
9. ADAPT(SP) Queue
10. Other Legal

#/no/invalid input.
Legal Menu (again)

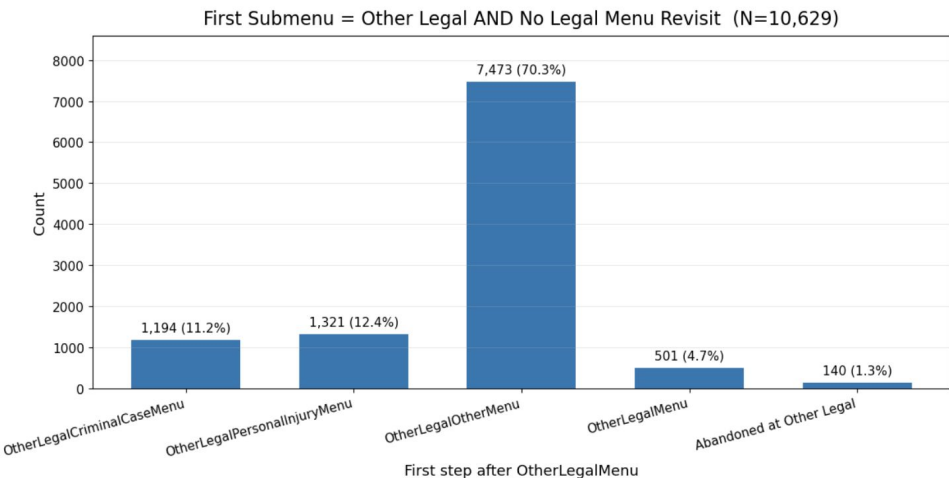

*. Front Desk Transfer

Q2: Other Legal Menu Breakdown

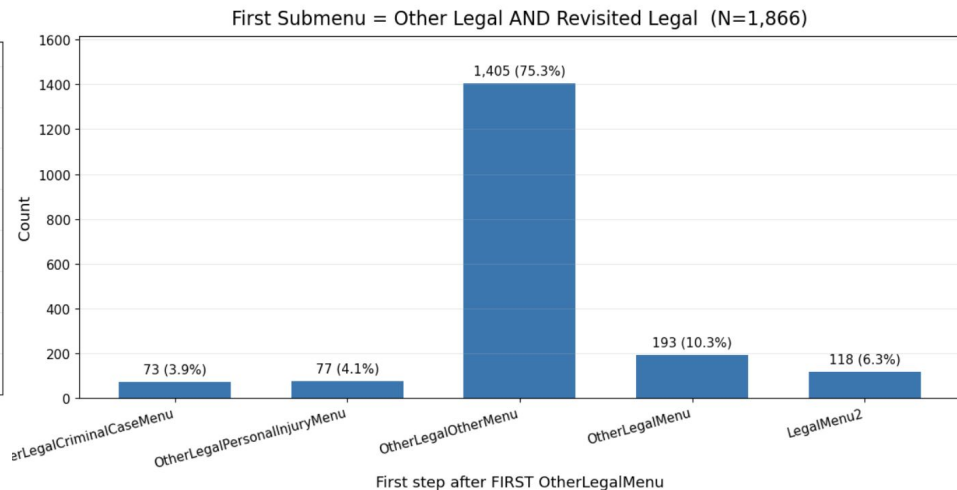

Q2: Other Legal Menu Breakdown

No Legal Menu Revisit

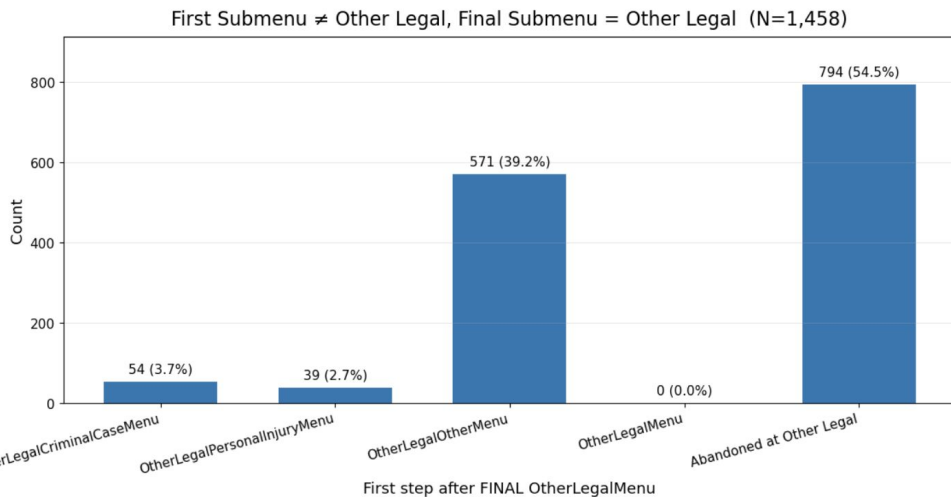

Legal Menu Revisit

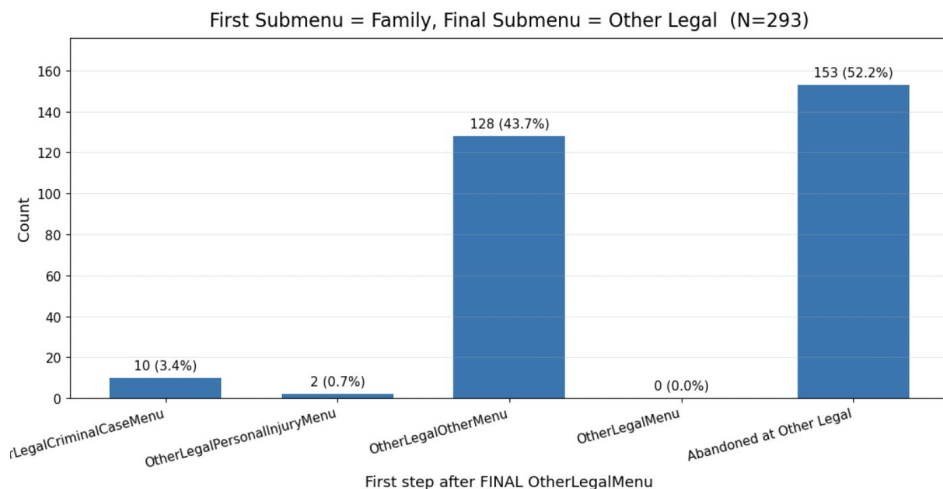

Q2: Other Legal Menu Breakdown

First Submenu != Other

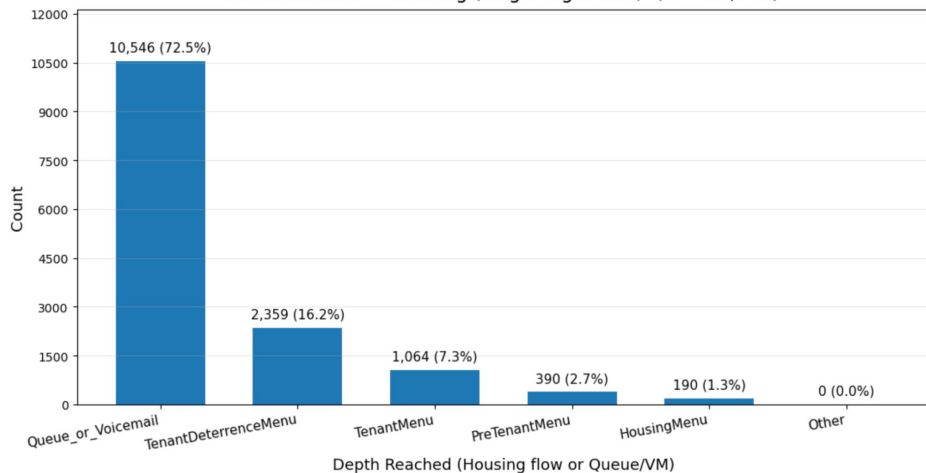

First Submenu = Family

Q3: Housing Submenu Abandonment

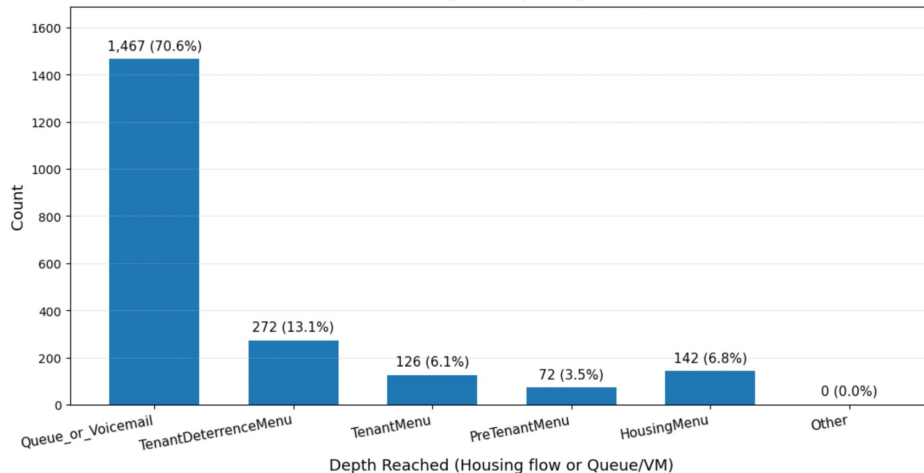

Housing Submenu Depth Reached

First submenu = Housing (single legal visit) (N = 14,549)

11.3% never reach queue / dead end

Final submenu = Housing (multiple legal visits) (N = 2,079)

16.4% never reach queue / dead end

Analysis of Other Legal Menu Visits

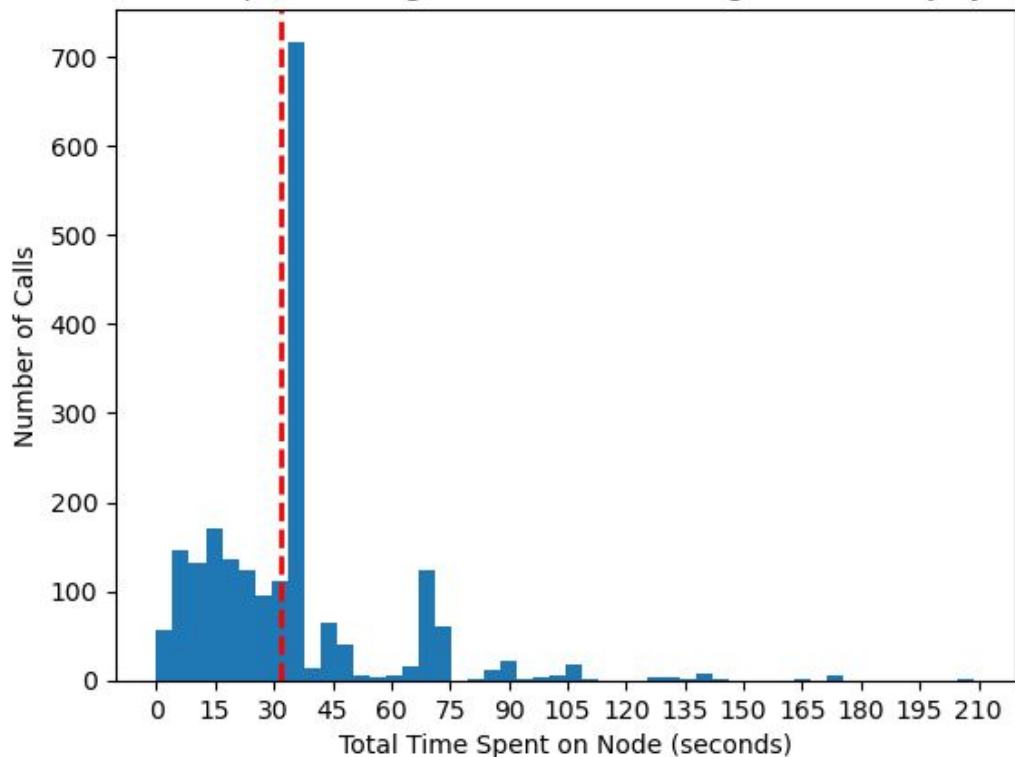

IVR-OtherLegalMenu-English.wav	2023	Other Legal Menu	If you are calling about a criminal case, press 1. If you are calling about a personal injury, car accident, traffic court, or medical malpractice, press 2. For all other issues, press 3. (goes to Menu 2027). To repeat these options, press the pound key. To return to the previous menu, press 9.
IVR-OtherLegalCriminalCase-English.wav	2025	Criminal	We do not handle criminal cases. If you have internet access, you can visit illinoislegalaid.org for information and referrals. You can also call CARPLS, a free legal advice hotline, at 312-738-9200. To repeat this message, press the pound key.
IVR-OtherLegalPersonalInjury-English.wav	2026	Personal Injury	We do not handle personal injury, car accident, traffic court or medical malpractice cases. If you have internet access, you can visit illinoislegalaid.org for information and referrals. You can also call CARPLS, a free legal advice hotline, at 312-738-9200. To repeat this message, press the pound key.
IVR-OtherLegalOther-English.wav	2027	Other Legal Other	Unfortunately we have limited resources and can only provide help with certain types of cases. If you have internet access, you can visit illinoislegalaid.org for information and referrals on many common legal issues. You can also call CARPLS, a free legal advice hotline, at 312-738-9200. Finally, you may be able to meet with a free lawyer to get advice about your legal issue at one of our monthly neighborhood advice clinics. For information about upcoming clinic dates and locations, press 1. To repeat this message, press the pound key. To return to the previous menu, press 9.

Summary

- Without even looking at data, this seems informationally dense
- Additionally, this never leads one to a queue
- We look at each of the submenus

Other Legal Personal Injury

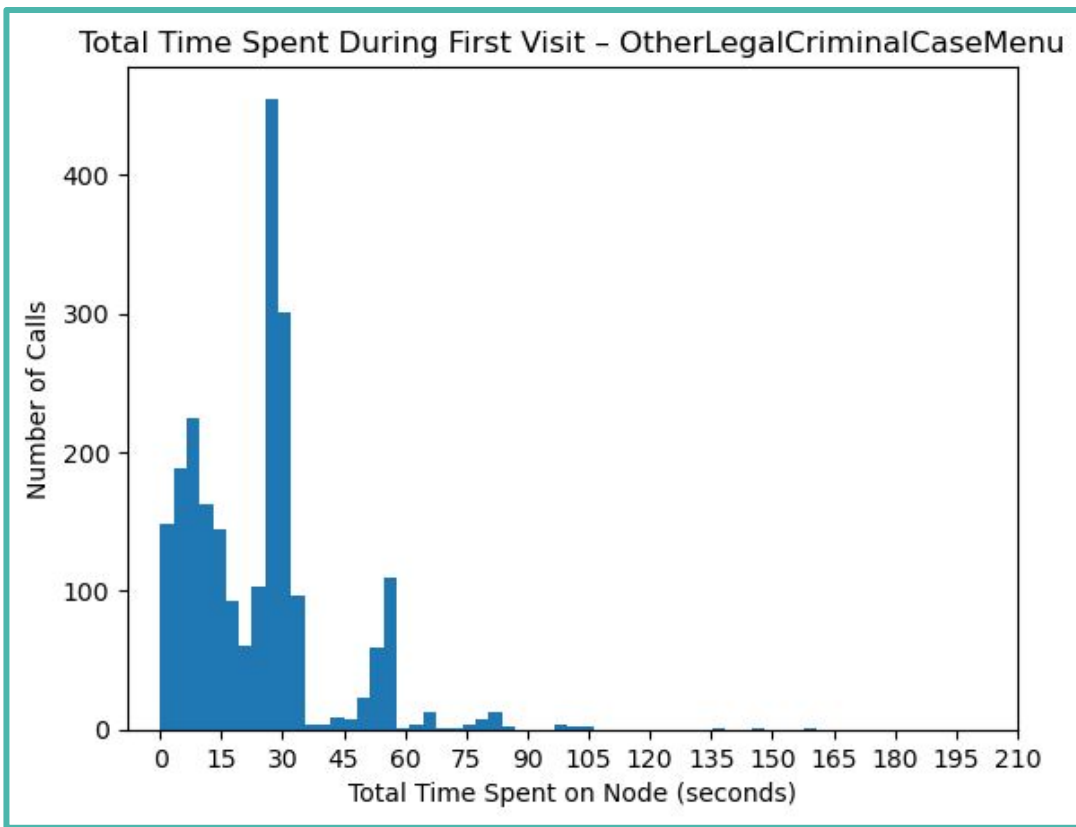

Total Time Spent During First Visit - OtherLegalPersonalInjuryMenu

Summary

- Red line represents the prompt recording length (32 seconds)
- **42.7%** of people who reach OtherLegalPersonalInjury end up not hearing the full prompt
- Almost half of the callers are missing information for other resources

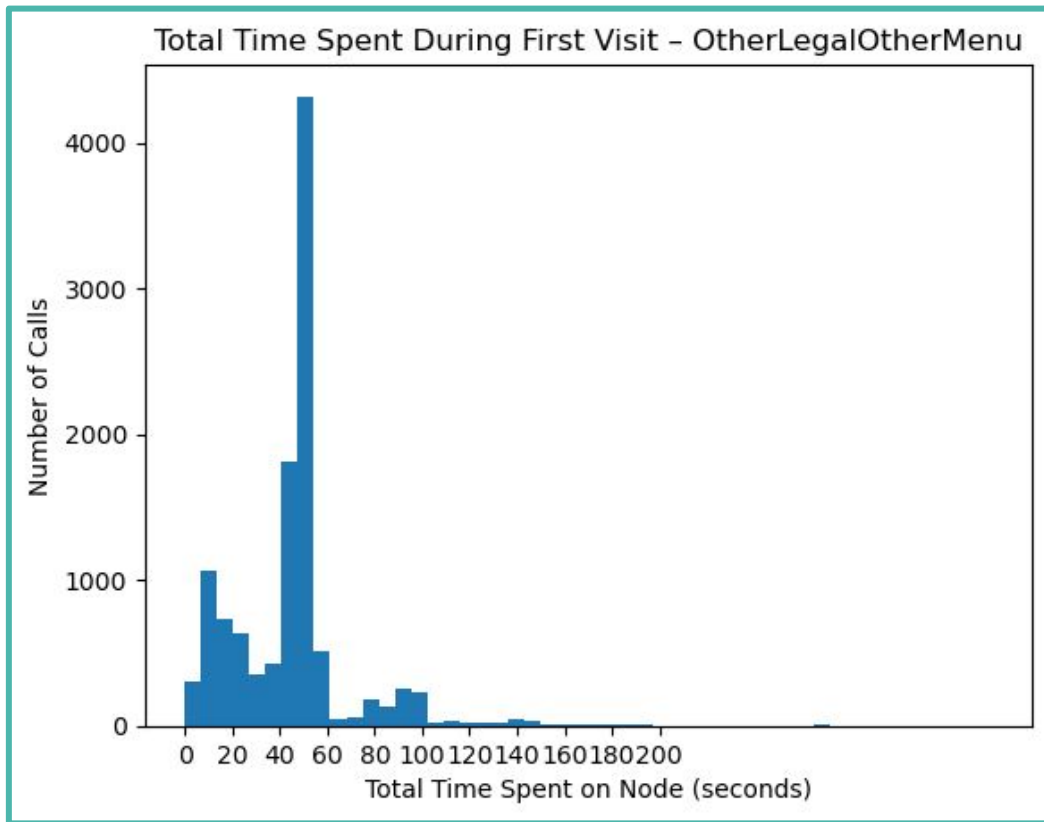

Other Legal Criminal Case

Summary

- Very similar distribution compared to Other Legal Personal Injury
- No Prompt length info given in recordings.

Other Legal Other

Summary

- Seems to be the longest prompt
- Still a considerable number of callers not hearing the full prompt.
- No prompt length info given in recordings.

Problem & Solution

Issue

Issue 1: The verbiage states “We can’t help you” in all 3 submenus

Issue 2: Significant numbers of callers are not hearing the full prompt
→ may be missing important information that may help them.

Issue 3: Other Legal Sub-menus are dense with information. Even if they hear the full prompt, how many would actually remember this information?

Solution

Solution 1: Acknowledge limits upfront

Clearly state Legal Aid’s limitation and the availability of other resources at the beginning
→ avoids repeating it each time in each sub menu.

Solution 2: Issue-specific options

Let callers select the type of legal issue they have and provide tailored resources (website, hotline, clinic info)
→ helps caller prepare for information that will be thrown at them.

Solution 3: Optional SMS delivery

Offer a text message option so users can receive resources directly on their phone

- From a design perspective, you should never expect a user to have to remember a significant amount of information

Analysis of top 10 most common paths

Total number of Calls: 248,264		
Full Path	Number of Calls	% of Total Calls
LanguageSelectionMenu -> MainMenu -> StaffDirectoryEnglishTransfer -> queue_present: Staff Directory	22,040	8.88%
LanguageSelectionMenu -> LanguageSelectionMenu -> didnt_reach_queue	14,520	5.85%
LanguageSelectionMenu -> didnt_reach_queue	13,118	5.28%
LanguageSelectionMenu -> MainMenu -> ClinicVoicemailTransfer -> queue_present: Clinic Voicemail Transfer	11,547	4.65%
LanguageSelectionMenu -> FarmworkerMainMenu -> didnt_reach_queue	9,630	3.88%
DisconnectContact -> SetCallerID -> SetCallerID -> queue_present: Intake Outdial Queue	9,337	3.76%
LanguageSelectionMenu -> LanguageSelectionMenu -> FrontDeskTransfer1 -> queue_present: Front Desk Transfer	7,220	2.91%
LanguageSelectionMenu -> MainMenu -> MainMenu -> didnt_reach_queue	5,609	2.26%
LanguageSelectionMenu -> ClosedMenu -> DisconnectContact1 -> didnt_reach_queue	4,870	1.96%
LanguageSelectionMenu -> MainMenu -> didnt_reach_queue	4,609	1.86%

Summary

- Over 10% of all calls are abandoned at Language Selection.
- This is strong evidence that these callers cannot understand English or Spanish
- In this case, "didnt_reach_queue" implies the call ends.

Language Prompt Recommendation

Current Verbiage

Thank you for calling Legal Aid Chicago. Para continuar en español, presione 2. To continue in English, press 1. If you need an interpreter or relay service, please wait on the line.

Problem & Solution

Solution: If a person needs an interpreter, they probably wouldn't understand what "interpreter" means in English

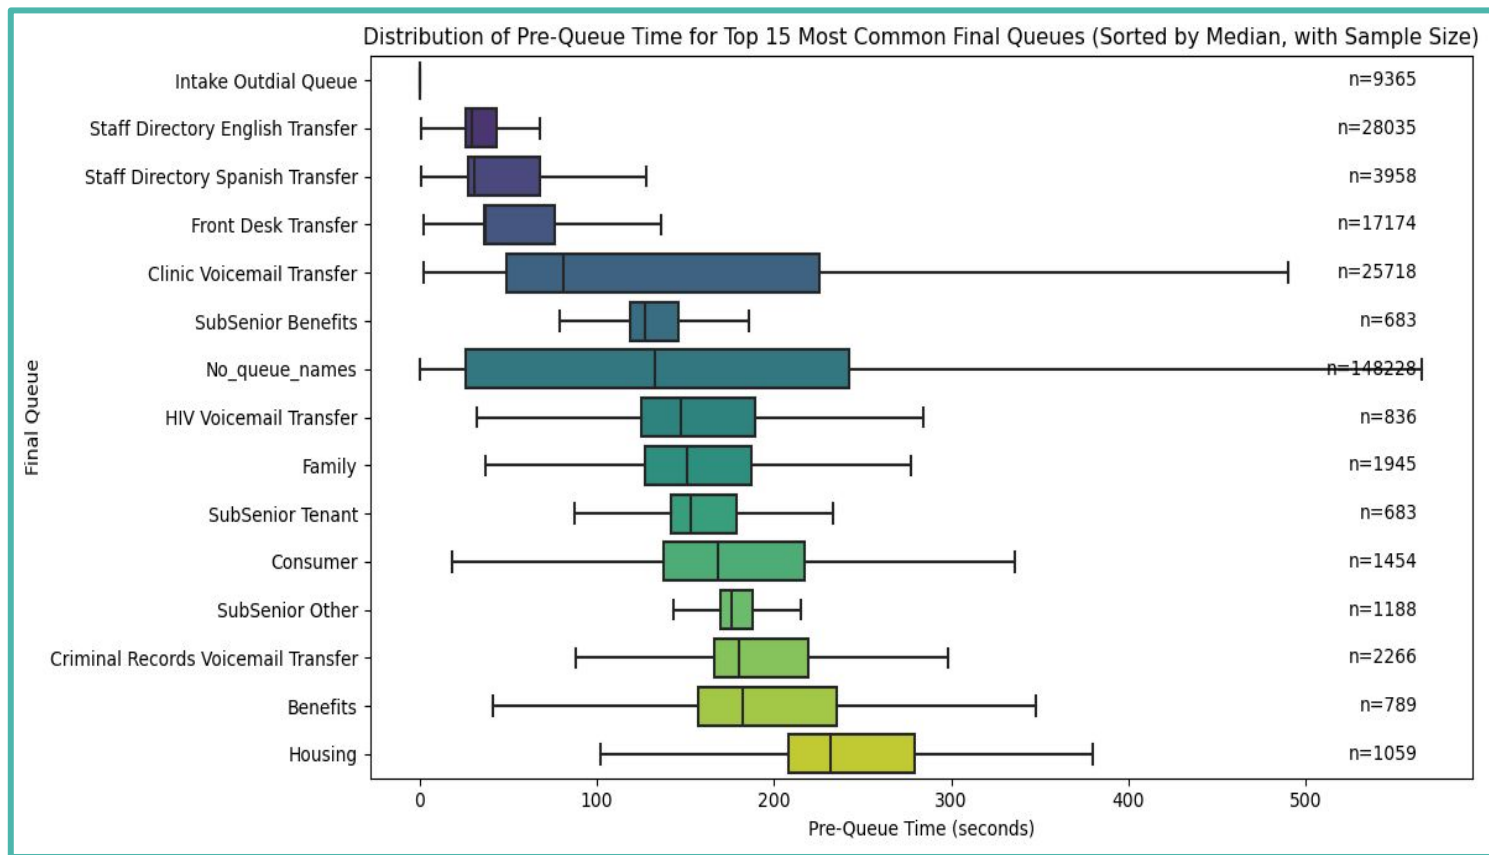

Recommendation: For common languages you cannot support, have a short, pre-recorded message in that language:

- "If you speak [language], wait on the line for an interpreter."
- Polish, Chinese, Tagalog (common Chicago languages)

Limitation

Uncertain callers abandoning at the language selection prompt do not understand English or Spanish

Time distributions for each queue (No recommendations)

Potential Next Steps

- Further path analyses:
 - Potentially delve deeper into the paths that callers take, and see what common paths are taken, the times the take, and whether it leads them to a desirable outcome
 - See if any of these commonly taken paths have shorter alternatives.
- Repeat the process of optimize the prompting of other menus that our team hasn't already done, such as family, Benefits, Housing.

Thank You!
