

Objective: Improve Verbiage Efficiency

Analyses

1. Do customers end up on the Clinic Voicemail transfer more than other final queue destinations, meaning it should be moved up in the menu?
2. Do customers use the option to leave compliments / complaints on the phone line?

Findings/Recommendations

1. No - No good recommendation for change
2. Yes! Recommendation: Remove option to leave compliments/complaints over the phone to free up resources.

Main Menu Verbiage - Voicemail

<i>Current Verbiage</i>	<i>Reason to Consider Change</i>
“If you are calling for help with a legal problem that you have not talked to us about yet, press 3. If you would like to hear about how to meet with a free lawyer in one of our neighborhood clinics, press 4”	Individuals who SHOULD be sorted into the correct queue (4) would be likely to hear the verbiage of 3 and click 3 if they don’t listen to all of the options, creating inefficiency due to improper individual/queue matching which slows the entire phone queue process down.

Analysis Plan: Clinic voicemail is there at many places (menus/sub-menus). Find out how many calls lead to the clinic voicemail, and how many lead to anything other than a voicemail (a queue, closed queue, or an agent). If most calls are leading to a clinic voicemail, then option 4 should be before option 3, otherwise the status quo is fine.

How do Calls End? (Voicemail Analysis)

Number of calls with missing final Queue Name: 103385

--- Call Counts ---

Other	51971
Voicemail	18174

Name: Call Type, dtype: int64

--- Call Proportions (%) ---

Name: Termination Reason, dtype: int64

Missing Data Explanation

Lots of missing final queue names. Based on data where we have the Termination Reason, it seems like this is primarily due to the customer leaving, or for another reason not reaching the end of their phone journey.

Voicemail vs. Non-Voicemail Explanation

The data show that 26% of calls end with Clinic Voicemail Transfer, while the remaining 74% of calls end elsewhere, shown in the list below. This shows that about 3x more calls do not result in Clinic Voicemail Transfer, compared to the number that do.

Interpretation & Recommendation

This shows that the voicemail destination is not more popular than the non-voicemail destination, so **I do not recommend moving option 4 before option 3 on the basis of efficiency.** However, we still do not know if callers are clicking 3 (when they should be clicking 4), requiring them to end their call and call back later! (data limitation). Unfortunately, I can't think of a way to test this with the data we have, so this may be the end of this analysis area.

Main Menu Verbiage - Compliment / Complaint Line

<i>Current Verbiage</i>	<i>Reason to Consider Change</i>
“Our compliment and complaint forms and procedures are available on our website, legalaidthicago.org . If you do not have internet access and would like to file a compliment or complaint, press 1”	The phone lines are already incredibly high-demand, and the supply of phone line operators and legal resources is limited. It may not make sense to offer the opportunity to stay on the phone line to file a compliment or complaint, especially if this could take away resources from someone who needs free legal assistance.

Analysis Plan: See if an agent name ever appears with a compliment / complaint. If it doesn't, then compliment / complaint may be a voicemail customer leaves, thereby having no resource expense.

Are Agents Used to Take Compliments/Complaints?

Total sessions that stayed in Compliment/Complaint (did not return to Main Menu): 17
Sessions with an Agent Name (spoke to agent): 15
Sessions without an Agent Name (likely voicemail): 2
Percent that reached an agent: 88.24%

*Yes! Compliments, complaints
are using agent time*

Interpretation & Recommendation

We see that agent time is being used to take in compliments and complaints - While it only appears 15 times in the last ~7 months, these are still resources that could go towards connecting more callers with legal services.

Recommendation: Remove compliment/complaint as an option, to free up some phone agent resources and prevent this from potentially being abused to reach a human.

Next Steps: Find total resource use?
